- App Permissions
- Static/Dynamic Analysis

Social Engineering

- Phishing
- Eavesdropping
- Information findings

We make exceptional security achievable and cost effective...

As the world becomes increasingly dependent on technology, securing sensitive data is imperative. The technical sophistication of mission-critical applications and infrastructure continues to increase complexity. We leverage our expertise to identify security issues and enable our customers to remediate across myriad technologies. Due to the sophistication of attackers persistently increasing, we adhere to stay ahead of tomorrow's attackers.

CYBER SECURITY PENETRATION TESTING

BASIC PACKAGE

A 3 day(min) to 15 days(max) penetration test for companies with up to 10 employees.

- 🔒 Network penetration test (Denial of Service, Unauthorized access, Malware scanning, Ports/Services, Access control)
